

What each ring holds

- | | | |
|--------------------------|---|--|
| individual model | Agents | the interacting models, each acting for a principal |
| | Microsystem | settings each agent acts in directly |
| agent-group interactions | Mesosystem | links between those settings |
| | 66 mechanisms | levers institutions use, in six families; one dot per mechanism
• tested ◐ proposed only ○ none
LLM-agent evidence |
| governing institutions | Exosystem | settings the agents are not part of that still shape them |
| | Macrosystem | law, markets, professional norms, and cultural values |
| | Chronosystem | model updates, drift, deprecations, incidents that change the rules |

After Bronfenbrenner (1979). Brackets show the three layers of Fig. 2.
