

EVALUATING THE MODEL-IN-INSTITUTION

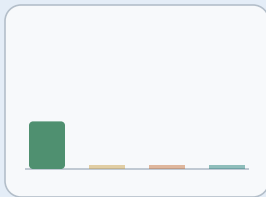

vary the agents → does the institution transfer?

vary the institution → which works, at what cost?

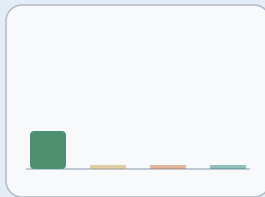

No enforcement

most benchmarks:
one fixed row

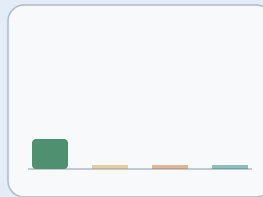

Homogeneous
group A

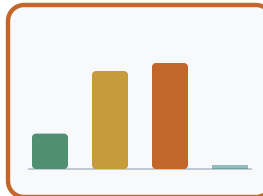

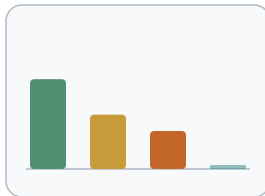

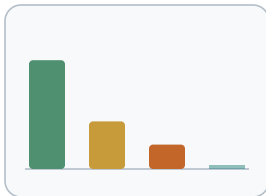

Homogeneous
group B

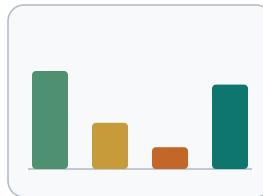

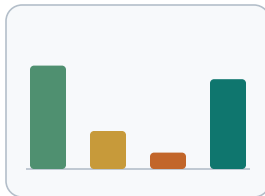

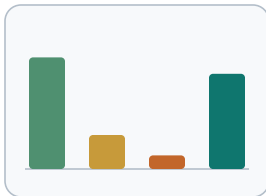

Mixed group
A + B

Fixed fine

Graduated +
repair + appeal

Interaction: the fine that helps group A backfires in the mixed group.

Each cell, repeated runs: cooperation enforcement cost false punishment repair

Bars are schematic, not results.
